Hawking's HomeRemote Pro Home Control and Remote Monitoring Starter Kit lets your customer secure, monitor and control their home remotely via a computer web browser or cellular phone.

Using the broadband connection, the HomeRemote Pro Internet Gateway communicates with the HomeRemote Pro servers to allow remote control of home lighting, appliances, doors, garages, window shades, thermostat and more from the user friendly HomeRemote Pro Interface.

With the HomeRemote Pro System installed, you log on to the HomeRemote Pro website, enter your login information and begin monitoring your home; or open the HomeRemote Pro application on your cell phone and begin viewing live video of your home or turn the heater on before arriving home. The applications for the HomeRemote Pro System are limitless; begin customizing one for your lifestyle today.

Hawking calls it "the first affordable, do- it-yourself, mass market, home automation and security solution Starter Kit"
