Triax announces a range of 720p and 1080p CCTV security and surveillance products, together with the HMX 441 HDBaseT matrix available in 4x4, 6x6 and 8x8 configurations.

The Triax CCTV line includes IP and HD-TVI cameras in fixed and varifocal dome model, with the HD-TVI options able to convert digital signals to analogue for distribution over coax as well as extending transmission distance. Also available are PTZ, IP and bullet designs.

In addition Triax offers DVRs and Network Video Records for the storage of footage, and customers can access all cameras remotely via Triax Mobile HD app on iOS or Android devices.

Meanwhile the HMX 441 HDBaseT matrix comes in kit form with x4 ultra slim receivers installers can mount behind a TV, with power handled by PoE.
