Lilin announces an entry-level addition to its IP camera line-- the MR832 outdoor bullet camera, featuring a 4mm fixed lens with an IP66 environment rating, 30m IR LED illumination and day/night imaging.

The MR832 features 2D wide dynamic range for accurate video capture even in high-contrast lighting. 3D Noise Reduction offers maximum clarity in low light conditions, while energy-efficient IR LEDs automatically illuminate scenes in complete darkness, allowing users to discover subjects at a range of up to 30m.

Video quality reaches 1080p resolution at 30ps, and the camera is compact and light enough for wall or ceiling mount applications. It supports ONVIF Profile S, and is powered by either PoE or DC12V.

To save installation time and add further flexibility the camera comes with a multi-angle adjustable wall/ceiling mount bracket.
