The Z-Wave Alliance announces its latest member-- Taiwanese security developer Vision, who will be contributing its security technology to the Z-Wave product portfolio.

Part of Vision's product range already has Z-Wave certification (the motion detectors and wireless door and window contacts) while the will soon be available with certification (including vibration sensors, smoke detectors, sirens with LED warning lights and electronically controlled locks).

Vision will also soon launch its range of Z-Wave compatible light switches and dimmers.

Z-Wave compatibility ensures interoperability with products by other Z-Wave Alliance members.

All of Vision's offerings carry anti-sabotage features, preventing removal by aunauthorised persons.
