In the **IP Security Pavilion**, EET Group's Safevision showed the new IQeye Sentinel 6 Series...

Ease of installation is the big sales point and EET (who distributes and sells this in 16 countries) claims installers can have it up and working in "less 5 minutes." And it comes with one touch focus, a special Remote Back Focus (IQ86x Models).

With support for up to 5 MP resolutions, these advanced cameras provide multiple, individually configured H.264 and simultaneous MJPEG streams.

It can handle temperatures up to -22 degrees.
