Crestron will showcase its new solutions for the residential and commercial markets at the trade fair for lighting and building technology, **Light + Building 2018** in Frankfurt, Germany on 18-23 March.

Visitors to the Crestron's stand will be able to experience technology that not only simplifies everyday life but enhances it too, including a preview of its new line of Horizon keypads and handheld remotes.

Addressing the themes of tomorrow, the new Horizon keypads are available in highly configurable single-gang models that combine up to four across, with designer aesthetics, superior button feel, four different button styles, programmable multicolour backlighting and interchangeable custom top and bottom trim pieces, with **Cresnet** wired communications. The beautiful new keypads provide Crestron residential dealers, as well as interior designers and architects with incredible flexibility in both control and design. The new Crestron keypads deliver an advanced custom control solution, as part of a complete Crestron smart home.

Crestron will also be showcasing the new **HR-310-I Handheld Remote** and **TSR-310 Handheld Touch Screen Remote**

. Combining all the best elements of the previous generation of Crestron remotes but adding more advanced functionality and ergonomic design, the new remotes have superior button feel, voice control, custom engravable buttons, movement sensor, profile settings and multi-colour buttons.

A host of **Crestron DIN rail products** such as the DIN-AP3, DIN-DALI-2, and DIN-1DIMU4 will also be shown to highlight its extensive range of lighting products, available to both the residential and commercial market.

New to Light and Building 2018 is Crestron's award winning **DigitalMedia NVX Series**, the latest addition to Crestron's extensive family of DigitalMedia products and "the only secure network AV solution available." NVX provides the best image quality and network security, that delivers 4K60, 4:4:4, and HDR over standard 1Gb Ethernet.

The Crestron stand will be also be showcasing its latest conferencing solutions such as **Crestron Mercury**, the only room solution that supports any video conferencing software will be featured, along with **Crestron FlipTops** a conference room solution redefining cable management and control.
