Sanus launches the Sanus Elements ELM4900-- a super-slim 90-degree HDMI adapter designed for HDMI connections in tight spaces.

Featuring an angled connector 75% shorter than typical HDMI connectors, it is ideal for use behind mounted ultra-thin TVs.

The adapter works with 3DTvs and components, handles resolutions of up to 4K and supports 10-, 12- and 16-bit colour depths.
