MiraDeed Technology Co. (Taiwan) releases a HDMI 2.0 fiber-optic cable (**MD6902002**) cable to send 4K-UHD/60p signals, calling it “world’s lowest power HDMI AOC.”

This HDMI Active Optical Cable (AOC) claims a transmission distance of up to 150 meters over optical fiber. It helps conquer problems with the higher copper power, electromagnetic interference (EMI), limited transmission distances and other technical issues.

The 19-pin cable is uni-directional and includes an electric-to-optical protocol converter on both ends.

HDMI CTS 1.4a Compliance.
