Sonos accessory maker Flexson announces a desk stand for the Sonos One and Play:1 speakers-- the S1-DS, a means to position the speaker at an angle, as well as minimise vibrations and simply add a bit more of flair to the whole setup.

The stand has the same footprint as the speaker, measuring 110 x 115 x 46mm. Available in the same shades of black and white as the Sonos offerings, it is suitable for use on coffee tables, desks and, of course, AV furniture. Construction is in metal with a chrome inlay.

“Owners of a Sonos One or Play:1 will find their perfect stand in the S1-DS,” Flexson says “It’s as sturdy and reliable as it is elegant and compact, making it the perfect partner for either of these two best-selling speakers.”

The S1-DS is available now.
