Not according to Structured Cable Products (SCP), saying its new professional grade networking cable family will "bring UTP performance to a new level."

The new networking cables-- HNCPRO and HNCPRO PLUS+-- are individually tested and certified (with each box carrying a report), are UL certified, ROHS compliant and exceed TIA/EIA requirements for CAT5E and CAT6 installations.

They come in lengths of 305m, wit SCP's unique cable labelling system.

Cables are available in 5 bright colours, and the company also backs its products with a lifetime warranty.
